Summary

Professional front end web developer / web application developer with 10+ years of experience. I have had the opportunity to work with very small local companies to start ups to very large international companies. I have continually worked on multiple projects with varying timelines and objectives concurrently. While maintaining communication as well as meeting deadlines.

I am highly driven and forever curious developer, constantly pursuing information related to our field to continue to push the boundaries and breathe life into projects.

I am a stickler for details and write 100% valid markup. I do not simply use Javascript, mooTools, jQuery, PHP I actually author my own classes, function and libraries when needed.

I have recently relocated to the greater Nashville, TN area (Murfreesboro) and am seeking an energetic, positive position with a local advertising agency or development firm.

- JavaScript
- Mootools
- jQuery Mobile
- Backbone.js
- MySQL
- .htaccess
- Adobe Creative Suite
- SEO
- Joomla
- Web Applications
- User Experience

Experience

Parthenon Publishing Web Developer

04 / 2013 - Present

My day to day activities include developing websites, landing pages and internal applications using technology like HTML5, CSS3, JS, AJAX, SASS and GitHub as well as maintaining existing client websites. This include writing custom modules & bug fixes for numerous CMS systems including Drupal, Joomla, Word Press and more. I also work with our strategists on various technologies and implementation strategies for our varying projects to help ensure a successful launch.

I have also been tasked with assisting in choosing technology that will assist with communication and work flow company wide.

Through it all I am extremely fortunate to work in a culture that encourages and challenges me to continue learning as well as implementing any new found skill sets.

Current Internal application stack consists of Node.js, Express.js MongoDB and socket.io
#fun

Somerset Capital Group, Ltd. Web Application Developer

09 / 2012 - 01 / 2013

I was brought in remotely as an extension of their in-house team to help implement a Javascript MVC UI framework for an in-house project that would allow the sales & management team to better manage all lease's throughout their life cycle. Building a modern set of tools to assist our outstanding team to be as productive as possible. I am fortunate to be able to play with a technology stack that includes: HTML5, CSS3, SASS, JS, ExtJS v4, AJAX, EXTJS, PHP, SYMFONY, DOCTRINE, RESTful API. Participated and assisted in project planning meetings as well as daily stand ups.

Cicayda Front End Developer

06 / 2012 - 07 / 2012

Cicayda is a local start up that's mission is to bring Web 2.0 thinking, design, user experience, scalability, functionality, and economic sensibility to the e-discovery world.

I was hired in as UI/UX developer working with technology stacks such as RequireJS, Backbone.JS, Twitter Bootstrap, JSON, HTML5, SASS, CSS3, jQuery. I participated in early project planning meetings and assisted in evaluating frameworks to meet the needs of the project.

Left Cicayda on a positive note as they decided to change technology stacks.

Robertson Group LLC Senior Front End Developer

08 / 2011 - 06 / 2012

Robertson Group is the firm behind Bolt System and is the foremost provider of Internet-based fleet management / trucking dispatch software in the industry. I main concentration was as a UI/UX Developer responsible for standardizing the current CSS/JS for other team members to easily implement as well as build the new UI for the next major version release. I researched and implement new technologies where it would be beneficial as well as troubleshoot existing code (HTML,CSS ,JavaScript, coldfusion, json, xml, ajax, db2, soap).

I prototyped a v4 that created an updated user experience for our products utilizing the existing db structure.

I managed the early development of the QualComm XML Soap web service API integration.

I develop javascript classes using Prototype (v3 of Bolt), MooTool (v4 of Bolt) to allow "No JS" programming for other developers to implement standardized widgets into the code base.

Assist/Advise other team members on CSS/JS/JSON/AJAX best practices.

AT Web Results Senior Web Developer / Partner

01 / 2004 - 12 / 2011

AT Web Results is focused on secure cutting edge website development and web 2.0 PHP/JavaScript/MySQL application development as well as business class hosting. • In my role I have taken a concept from conception through fruition all the while supplementing with creative ideas and maintaining firm deadlines on a strict budget. • Have developed many AJAX/JAVASCRIPT/PHP/MySQL applications and CMS system Developed a calendar system that integrates with a bash script to automate reminder calls. A very sleek web 2.0 survey system, with dynamic surveys populated by the project administrator through a custom CMS

Quiet Light Communications 11 / 2010 - 07 / 2011 Front End Web Developer

Quiet Light Communications is a very forward think advertising agency that I had the honor of working for. I provided front end programming expertise in a team environment where ideas, knowledge and code were shared openly.

I ran project management as well as lead developer on projects using HTML/HTML5, CSS, Javascript, AJAX, Flash (Timeline,AS2,AS3), PHP/MySQL, Server Administration. I was also responsible for troubleshoot existing code (HTML,CSS,PHP,JavaScript) as wells as propose solutions and implement them.

Develop valid (x)HTML(5) separating design from code base via CSS(3). I work with creative team on new concepts as well as building project scope and project quotes. I developed javascript and php applications to suite the individual needs of client sites as well to engage the visitor. Integration with Google Analytics as well as tracking and improving site performance based on results. Suggest and Implement both onsite and offsite SEO. Create custom PHP modules, models and controllers for Joomla and CodeIgniter based on project needs.

Some of the cool technologies I get to play with everyday: (x)HTML, HTML5, CSS2, CSS3, Javascript, jQuery, mooTools, AJAX, PHP, Code Igniter, mySql, Flash, ActionScript 2.0, ActionScript 3. Just to name a few.

GTS Marketing Solutions Fall 2004 09 / 2004 - 12 / 2004 Partner / Lead Developer

GTS Marketing Solutions was I small upstart between family friends and myself. We focused on print advertising as well as the web. Out of this experience was born AT Web Results, Inc.
